

Coding & Solution

Date	28 September 2026
Team Id	SWTID-2026-6259
Project Name	AI StudyBuddy API
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link/URL	https://github.com/G-Sakthipriya/AI-Study-buddy.git
Programming Languages(s)	JavaScript
Framework(s) used	Node.js, Express.js, React.js, Mongoose
Key Features Implemented	User authentication using JWT, study material management, AI-generated summaries, flashcards, quizzes, personalized study plans, MongoDB data storage, and Google Gemini AI integration.
Pending/Incomplete features	No major features are pending
Setup/Run Instructions	Install Node.js and MongoDB. Open the project folder in VS Code and run npm install. Configure the .env file with MongoDB URI, JWT secret and Gemini API key. Start the backend using npm start and access the application through the configured frontend.

Code Quality Checklist

S.No	Criteria	Status (Yes/No)
Code Quality Checklist	Code is modular and organized into functions/ classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments/documentation where necessary	Yes
4	Error Handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes/ Comments:

The project is developed using a modular architecture with secure authentication, database integration, and AI-powered learning features. The code is organized for easy maintenance, scalability, and future enhancements.
