

Customer Journey Map

Date	28 September 2026
Team ID	SWTID-2026-6259
Project Name	AI Study Buddy API
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 – Access & Upload	Stage 2 – AI Learning Support	Stage 3 – Review & Save
Actions <i>What does the customer do?</i>	• Register or log in • Complete authentication • Upload study material or enter study content • Choose the learning task	• Select an AI feature • Generate a concise summary • Create flashcards • Generate quizzes • Create a personalized study plan	• Review generated learning resources • Use the resources for revision • Save generated resources • Retrieve them for future reference
Touchpoint <i>What part of the service do they interact with?</i>	• LearnMate application • Register/Login interface • Study-material upload • Dashboard	• AI feature interface • Summary generation • Flashcard generation • Quiz generation • Study-plan generation • Google Gemini AI service	• Generated summaries • Flashcards • Quizzes • Study plans • Dashboard • Saved learning resources
Customer Thought <i>What is the customer thinking?</i>	• “I need to organize my study materials.” • “I want secure access to my learning resources.” • “I need a simple way to start studying.”	• “This can reduce my manual study work.” • “I can understand the material more quickly.” • “I can test my knowledge and revise effectively.”	• “I now have useful revision resources.” • “I can access these materials again later.” • “This makes my exam preparation easier.”

Customer Feeling <i>What is the customer feeling?</i>	• Confused by scattered materials • Curious • Hopeful	• Interested • Relieved • Motivated	• Satisfied • Confident • Better prepared
---	---	---	---

Process Ownership <i>Who is in the lead on this?</i>	• Authentication module • Express/REST API • Study-material management • MongoDB storage	• AI Service Layer • Google Gemini API • Backend controllers • REST APIs	• MongoDB/database layer • Backend resource management • Dashboard/client application
Opportunities <i>How can we improve this stage?</i>	• Make registration and login simple • Make material upload easy • Provide secure access to user resources	• Provide clear AI feature choices • Generate concise and easy-to-understand content • Personalize study plans based on goals and available time	• Make saved resources easy to retrieve • Organize summaries, flashcards, quizzes and study plans • Support continuous learning and revision
